FOOD SECURITY IN NUTRIENT-STRESSED ENVIRONMENTS: EXPLOITING PLANTS' GENETIC CAPABILITIES

Guest editors:
J.J. Adu-Gyamfi & Z. Rengel

Preface **vii–viii**

Physiological traits for crop yield improvement in low N and P environments
T.R. Sinclair and V. Vadez **1–15**

Varietal differences in root growth as related to nitrogen uptake by sorghum plants in low-nitrogen environment
T. Nakamura, J.J. Adu-Gyamfi, A. Yamamoto, S. Ishikawa, H. Nakano and O. Ito **17–24**

Physiological adaptations for nitrogen use efficiency in sorghum
J.W. Maranville and S. Madhavan **25–34**

Root exudates as mediators of mineral acquisition in low-nutrient environments
F.D. Dakora and D.A. Phillips **35–47**

Modelling root-induced solubilization of nutrients
G.J.D. Kirk **49–57**

Genetic control of root exudation
Z. Rengel **59–70**

Genotypic variability in phosphorus solubilizing activity of root exudates by pigeonpea grown in low-nutrient environments
S. Ishikawa, J.J. Adu-Gyamfi, T. Nakamura, T. Yoshihara, T. Watanabe and T. Wagatsuma **71–81**

Role of oil microorganisms in improving P nutrition of plants
P. Gyaneshwar, G.N. Kumar, L.J. Parekh and P.S. Poole **83–93**

Root cell-wall properties are proposed to contribute to phosphorus (P) mobilization by groundnut and pigeonpea
N. Ae and R.F. Shen **95–103**

The phosphate uptake mechanism
F.W. Smith **105–114**

Transporter genes to enhance nutrient uptake: Opportunities and challenges
J. Dunlop and T. Phung **115–122**

Scope for genetic manipulation of mineral acquisition in chickpea
Md. Yusuf Ali, L. Krishnamurthy, N.P. Saxena, O.P. Rupela, J. Kumar and C. Johansen **123–134**

Prospects for using conventional techniques and molecular biological tools to enhance performance of 'orphan' crop plants on soils low in available phosphorus
C.T. Hash, R.E. Schaffert and J.M. Peacock **135–146**

Breeding for better symbiosis
Z. Rengel **147–162**

Aluminum tolerance in nodulated N_2-fixing legumes species native to two contrasting savanna sites
M.-L. Izaguirre-Mayoral, S. Flores and T. Oropeza **163–168**

Appropriate farm management practices for alleviating N and P deficiencies in low-nutrient soils of the tropics
P.C. Smithson and K.E. Giller, **169–180**

Farmer preferences and legume intensification for low nutrient environments
S.S. Snapp and S.N. Silim **181–192**

Role of modelling in improving nutrient efficiency in cropping systems
P.S. Carberry, M.E. Probert, J.P. Dimes, B.A. Keating and R.L. McCown **193–203**

Breeding crops for enhanced micronutrient content
R.M. Welch and R.D. Graham **205–214**

Volume 245 No. 2

The effect of inoculation with *Azospirillum brasilense* on growth and nitrogen utilization by wheat plants
M.I. Saubidet, N. Fatta and A.J. Barneix **215–222**

Natural ^{15}N abundances of maize and soil amended with urea and composted pig manure
W.-J. Choi, S.-M. Lee, H.-M. Ro, K.-C. Kim and S.-H. Yoo **223–232**

The morphological changes of wheat genotypes as affected by the levels of localized phosphate supply
H. Sun, F. Zhang, L. Li and C. Tang **233–238**

Nematicidal and allelopathic potential of *Argemone mexicana*, a tropical weed
S. Shahid Shaukat, I.A. Siddiqui, G.H. Khan and M.J. Zaki **239–247**

Interrelationship between phosphorus toxicity and sugar metabolism in *Verticordia plumosa* L
A. Silber, J. Ben-Jaacov, A. Ackerman, A. Bar-Tal, I. Levkovitch, T. Matsevitz-Yosef, D. Swartzberg, J. Riov and D. Granot **249–260**

Screening rough-seeded lupins (*Lupinus pilosus* Murr. and *Lupinus atlanticus* Glads.) for tolerance to calcareous soils
J.D. Brand, C. Tang and A.J. Rathjen **261–275**

Phosphorus fertilizer recovery from calcareous soils amended with humic and fulvic acids
A. Delgado, A. Madrid, S. Kassem, L. Andreu and M. del Carmen del Campillo **277–286**

Molybdenum efficiency in winter wheat cultivars as related to molybdenum uptake and distribution
M. Yu, C.-X. Hu and Y.-H. Wang **287–293**

Mite (Acari) colonization of vegetated mine tailings near Sudbury, Ontario, Canada
M.G. St. John, G. Bagatto, V. Behan-Pelletier, E.E. Lindquist, J.D. Shorthouse and I.M. Smith **295–305**

Distribution of assimilated carbon in plants and rhizosphere soil of basket willow (*Salix viminalis* L.)
A. de Neergaard, J.R. Porter, A. Gorissen **307–314**

Are *Bradyrhizobium japonicum* stable during a long stay in soil?
M. Obaton, A. Bouniols, G. Piva, V. Vadez **315–326**

Quantifying below-ground nitrogen of legumes
W.D.F. Khan, M.B. Peoples and D.F. Herridge **327–334**

Erratum **335**

Volume contents **337–339**

Author index **341**
